

Why Choose Woodguard ?

Fencing is a major capital investment that should be carefully planned before construction. Attractive fences tend to be more expensive and in general, safer fencing is also higher in cost. Woodguard fencing has a higher initial cost but significantly less maintenance cost and a longer lifetime.

Things to keep in mind when choosing your next fencing material:

Wood

- Every 3 years or so, you'll need to re-paint or re-stain the fence.
- Labor to clean and sand the fence prior to applying the paint or stain.
- Cost of a high-quality paint or stain that is designed to withstand the elements.

Vinyl

- Weak – not intended for animal containment.
- Brittle in the cold temperatures and could split or crack into shards when bumped or kicked and injure your animals.

Woodguard

Low-Maintenance – *Never Paint, Sand or Stain!*

Strong - Solid wood core with a durable polymer coating that gives you a structural long lasting fence that keep's your animals safe.

Safe - Solid wood core treated with a 100% Organic Certified compound.
- Non-toxic blend polymer coating remains pliable in *all* weather conditions.
- No cracking, peeling or splintering.

Easy Installation – No special tools required. Cuts and installs just like wood.

Guarantee – Over 35 years of proven durability and backed by a

The right choice for your next fencing project !
